

THREE KILLED, 100 INJURED

Miami Mine, Near Globe, Arizona, Scene of Fatal Airblast

GLOBE, Ariz., April 17.—An airblast generated by the fall of 3,000,000 tons of capping at the Miami mine, seven miles from here, killed three miners today and injured 100 others, four probably fatally. The blast was so terrific at the 470 foot level that ore cars were blown from 25 to 100 feet.
