

3 Teen-Agers Found Dead in Closed Mine

CENTERVILLE, IOWA —(AP)
—Three teen-agers who left home early Tuesday to explore a cave, were found dead last night in a coal mine which had been closed down for the summer.

Sheriff A. G. Morlan said the three apparently were victims of "black damp," a deadly gas which sometimes accumulates in mines.

Bodies of Carl Hobart, 14, Charles Dunham, 15, and Mickie Coulter, 15, were found by Walter Adams, their scout-master, and Albert Adams, a tavern owner.
