## 07/27/1984, Southern Industries Corporation, Shearwater Dredge

No report or news articles could be found related to this accident. The following comes from the MSHA Fatality Archive Database.

<sup>&</sup>quot;The victims and two women were traveling in a 15 foot wooden boat powered by an outboard motor from a boat landing to the dredge when the boat struck a moored barge. The boat capsized causing the victims to drown. They were not wearing lifejackets although there were three lifejackets in the boat. The women swam safely to shore."
