

## THE NEILSON MINE FIRE.

**An Attempt Will be Made to Smother  
the Flames.**

SHAMOKIN, April 2.—The fire is still raging at the Neilson shaft. The Elmira owners of the mine arrived last night and the work of flooding was stopped in order to first try smothering the flames.

Everything has been boarded up where air entered and there is danger of a gas explosion. No person is allowed within a hundred yards of the workings.
