

Nine Crews Battle Blaze In Anaconda Badger State Mine

BUTTE, Mont., March 2.—(AP) —Underground fire fighters from various Anaconda workings sent here to fight the fire in the Badger State Copper mine of the Anaconda Copper Mining company, which cost the lives of three men yesterday, were endeavoring tonight to block off the blaze by concrete bulkheads and brattices.

Nine crews early today had succeeded in bratticing the opening between the Badger State and the Diamond mine, stopping all gas from entering the workings.
