

Four Miners Killed

DUCKTOWN, Tenn., Nov. 5 (AP) —Four zinc ore miners died in a plunge down a 1,300-foot shaft at the Tennessee Copper Company's Calloway Mine two miles south of here. The men had reached the top of the shaft where they were to enter a huge bucket to be lowered into the mine. Whether they entered the bucket or just what happened after they got to the top of the shaft was not known.
